

Product launch:

Hand stick machine Hikoki SP 18VA

Applications

The machine is designed for treating edge areas and smaller surfaces

- Creation of bush-hammered surface structures
- Removal of thin coatings
- Removal of filler and adhesive residues

Product advantages

- Extremely high concentricity
- Smooth running of the machine
- Protection of the spindle due to damped milling plate
- Speed optimised to max. 1.100 rpm
- Supplied in sheet steel case and incl. milling plate

Technical data

- Working width 200 mm
- Mains voltage V/Hz 230/50
- Protection class / II
- Power consumption W 1250
- Idle speed 600 - 1100 rpm
- Tool holder M14
- Weight 15 kg
